Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/17/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Grundstrom (US 2,127,355).

In regard to claim 1, Grundstrom teaches a pair of protective pants (10) having an upper portion, which when worn covers a lower region of a wearer's torso, and two leg portions, each of which when worn covers one of the wearer's legs, wherein each leg portion has an upper region, which extends downwardly from the upper portion, and a lower region, which extends upwardly from a lower end of said leg portion toward the upper region and which terminates not higher than where said leg portion when worn covers the wearer's knee (see figure 1), wherein the lower region has a layer of

puncture-resistant material which is made from a cloth fabric (12), extends upwardly from the lower end of said leg portion, and surrounds the lower end of said leg portion (page 1, column 2, lines 1-7 and 20-50).

In regard to claim 2, Grundstrom teaches the pair of protective pants of claim 1 wherein the upper portion and the upper regions of the leg portions have an outer layer of abrasion-resistant material and wherein only the lower region of each leg portion has the layer of puncture-resistant material (see figure 1).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grundstrom in view of Amberg (US 4,282,608).

Grundstrom teaches a trouser garment as described above in claim 1. However, Grundstrom fails to specifically teach the trousers having an inner lining.

In regard to claim 3, Amberg teaches a pair of protective pants of claim 1 wherein the upper portion and the leg portions, from the upper portion to the lower ends of the leg portions, have one or more inner layers (figures 1 and 2).

In regard to claim 4, Grundstrom teaches the pair of protective pants of claim 1 wherein the upper portion and the upper regions of the leg portions have an outer layer

Art Unit: 3765

of abrasion-resistant material. Only the lower region of each leg portion has the layer of puncture-resistant material (see figures and page 1, column 2, lines 20-38).

Amberg teaches a pant garment wherein the upper portion and the leg portions, from the upper portion to the lower ends of the leg portions, have one or more inner layers (figures 1 and 2).

It would have been obvious to have provided the protective work pant of Grundstrom with the pant having an inner liner of Amberg, since the work pant of Grundstrom having an inner liner would provide an additional layer that absorbs perspiration and prevents direct contact between the trousers and the skin the user.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and can be found cited on PTO-892 form submitted herewith.
